

Facilities Plan

Mission

Our mission is *“to offer educational opportunities for students to achieve professional development and success through real-world tools and applications to obtain employment.”*

Howard Healthcare Academy was founded on strict principles and core values that center around success and growth. We have created educational facilities that focus on live, hands-on experience. Through real life learning environments, and technical courses, instructors prepare our students with the hands-on knowledge they need to apply for an entry-level dental assisting position. We want to help out future dental assistants and help them build careers. This way, the dental community / employers will have the support needed to provide patient care.

Vision

The vision of Howard Healthcare Academy is to be recognized as a top performing educational institution and be the preferred choice for quality education and training.

Facilities Plan

Physical Facilities

Howard Healthcare Academy has developed this plan to address and maintain the adequacy and improvement of all physical facilities for its campus. The maintenance of facilities at the institution is managed by the Executive Assistant to the CEO, Mrs. Gina Hernandez. Mrs. Hernandez oversees the maintenance of facilities to ensure a safe, clean, and healthy learning environment. Utilizing a team of dedicated professionals Mrs. Hernandez is able to provide proactive, high quality custodial, building maintenance and grounds services to the institution in a timely and cost effective manner. All team members are skilled in their respective area of expertise and perform quality control, utilize effective communication, and practice safety as well as preventative maintenance on a regular basis.

The Howard Healthcare Academy custodial staff provide routine cleaning of buildings, waxing of floors, trash removal, carpet cleaning, etc. Regular inspections are conducted at facilities to ensure federal, state, and local codes are met. If recommendations or deficiencies result from inspections, Howard Healthcare Academy staff works closely with Mrs. Hernandez to address the issue until the requirements are met. Even though the Howard Health Academy custodians do not report directly to administrators, they work closely together to ensure an adequate, safe, and healthy physical environment for students, staff, and visitors

Technical Infrastructure

Howard Healthcare Academy has developed this plan to address and maintain the adequacy and improvement of the school's technical infrastructure. In order to maintain adequate technical infrastructure, the institution employs one contracted IT professional from Fireworx Network Management who sets up computers and printers on its network. He orders hardware, software, and accessories, and helps staff troubleshoot.

Evaluation & Revision

Howard Healthcare Academy's method for evaluation and revision of adequacy of the technology infrastructure is accomplished through ongoing live audit maintenance of all computer systems provided on contractual basis through Fireworx Network Management. Expansion, repair, replacement, and security of all technology equipment is covered therein.
